Learning Objectives for Participants

At the conclusion of this seminar, the participant should be better able to:

1. Identify capabilities of an Electronic Health Record (EHR) and apply strategies related to optimal EHR implementation.
2. Consider change management, project management, and governance concepts and methods as they apply to health IT projects.
3. Apply the process of going from problem identification to clinical decision support intervention.
4. Plan an approach to designing an informatics quality improvement intervention.
